SUMMARY

I'm drawn to products that require both engineering and taste. The kind that start as conversations, rough sketches, operational problems, or even clear business goals and eventually become tools people rely on daily and genuinely enjoy using.

WORK EXPERIENCE

Product Engineer, Beswift Stack 2026 - Present

- Build digital products for startups and businesses within a multidisciplinary agency team.
- Translate ambiguous client requirements into technical solutions.
- Contribute across engineering, product execution, and rapid delivery workflows in fast paced environments.

Independent Product Engineer, Archiv 2026

- Designed and built a centralized academic resource platform for cross school student material discovery.
- Engineered the platform end-to-end with user experience and performance in mind.
- Launched a growing MVP enabling students to access, upload, and manage educational resources.

Product Engineer, Mealverse • via BeswiftStack 2026

- Engineer an AI-powered meal planning platform focused on reducing food decision fatigue.
 - Owned frontend architecture, UX decisions, and performance optimization from concept to live deployment.
 - Collaborated with cross-functional teams, enhancing project success rates.
-

EDUCATION

Bachelor of Science in Computer Science 2025 - Present Jospeh Sarwan Tarka University
